

LZB VANE MOTORS

LZB VANE MOTORS

Introduction

LZB vane motors are designed to provide high performance and high standards of reliability. They are characterized by high power output and small physical size, Figure 12.

Figure 12

The design of the motor is long and slim. This gives a number of advantages, such as high power-to-volume ratio, low air consumption and long vane life. All motors utilize five vanes, which are supplied with vane air, to ensure excellent starting and low speed performance. Multi-step planetary gears are used to meet the torque and speed requirements of the application, offering high efficiency with compact dimensions.

Shaft loading

The maximum allowable loads on a given motor's output shaft are illustrated in Figures 13, 14. The relevant load curve code for a motor is stated in the data tables for each specific motor designation, under the "Shaft load code" column. These values have been calculated for shaft and bearing working lives of 10 million turns. To achieve a working life of 100 million turns, the loading factor must be halved.

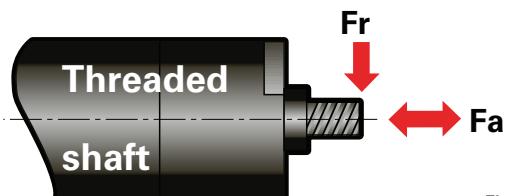

Figure 13

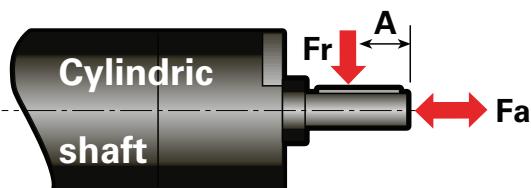

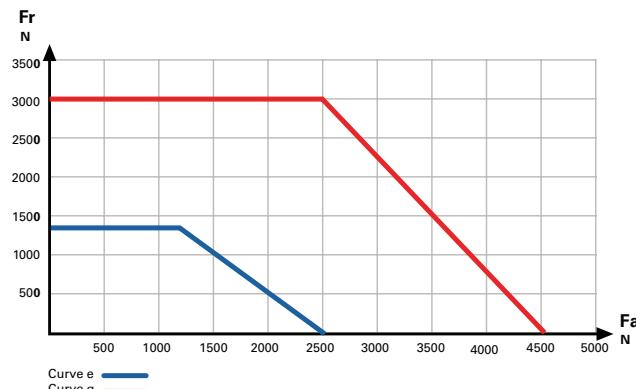

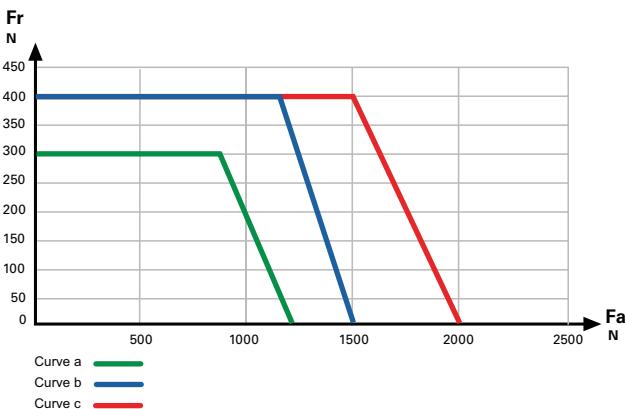

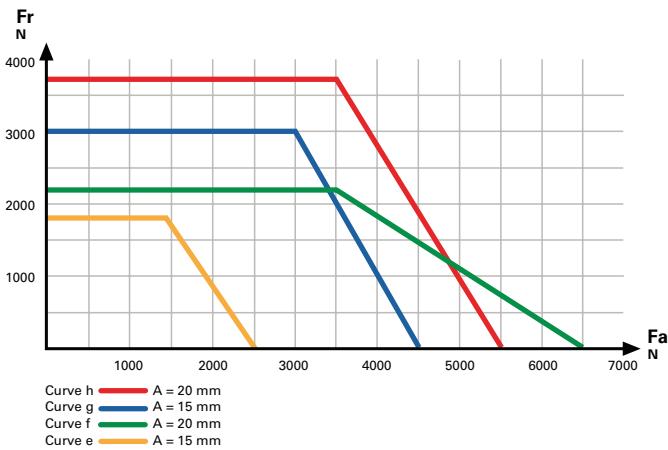

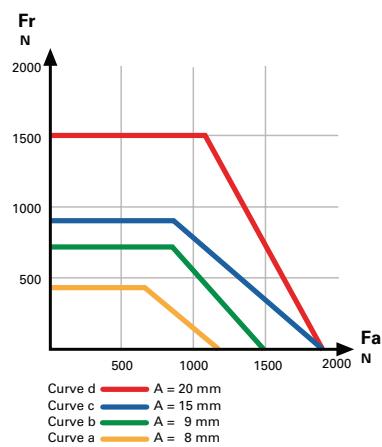

Figure 14

Mounting

Type LZB vane motors may be mounted in any position. To facilitate this, flange and foot mounting are available for each motor, Figure 15.

Foot

Flange

Figure 15

Connection

Non-reversible motor

When the compressed air supply is connected to the inlet, the direction of rotation will be as shown in Figure 16. If the exhaust air is to be piped away, a hose should be connected to the exhaust outlet. (EXH).

Reversible motor

The compressed air supply should be connected to the inlet that gives the desired direction of rotation, Figure 17. The inlet not in use functions as an additional outlet: it must not be plugged.

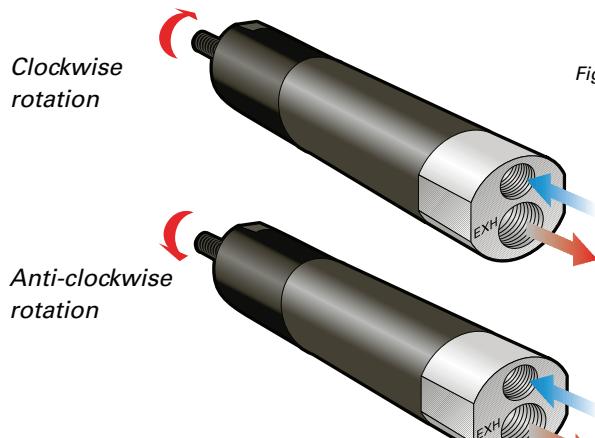

Figure 16

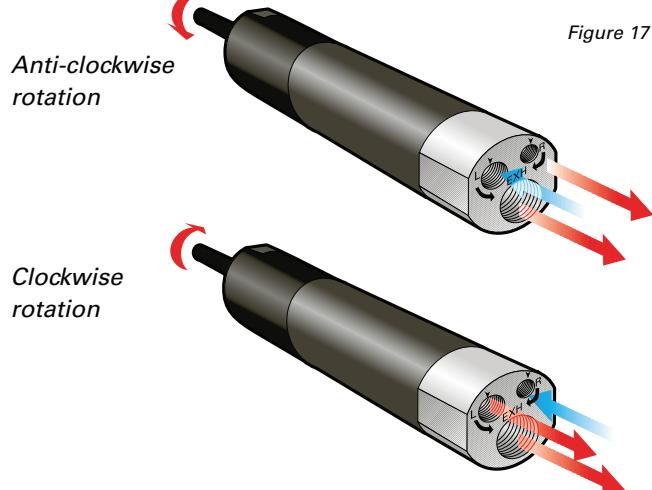

Figure 17

Hose dimensions

Information on hose dimensions recommended for use with type LZB air motors is detailed in table below. These dimensions are valid for hose lengths up to 3 m. If lengths above that are used, choose a one size larger hose.

Hose size up to 3 m length

Motor size	Rotation	Inlet connection thread	Inlet connection thread	Inlet hose*	Inlet recommended nipple connection	Inlet nipple* diameter	Outlet connection thread	Outlet hose*	Outlet recommended nipple connection	Outlet nipple* diameter

¹⁾ For Shaft loading curves, see page 16.

NOTE: - If running motors with 100% dry air and no lubrication, performance can be reduced with 5-15% at max output.

- To optimize life time for a lubrication free motor, use lubricated air if the application allows it.

Dimensions (mm)

Conversion factor 1 mm = 0.04 inch

VANE MOTORS LZB14-RL

Stainless steel and lubrication free

**0.11 – 0.16 kW
0.15 – 0.21 hp**

Material in parts:

- Back head and front part stainless steel:
ISO 683/XIII Type 17, SS 14 2346, DIN 17440 X12CrNiS188
- Outgoing shaft and casing/gear rim stainless steel:
ISO 683/XIII Type 9b, SS 14 2321, DIN 17440 X22CrNi17
- 100% Silicon free
- Grease that conforms to Food Grade regulations

EX certification valid for fixture mounted use only with a maximum surrounding temperature of +40°C (104°F).

For optional stainless steel motor cell, vane kits and other accessories see chapter Accessories.

VANE MOTORS LZB22-RL

Stainless steel and lubrication free

**0.16 – 0.27 kW
0.21 – 0.36 hp**

Material in parts:

- Back head, casing and front part stainless steel: ISO 683/XIII Type 17, SS 14 2346, DIN 17440 X12CrNiS188
- Outgoing shaft and gear rim stainless steel: ISO 683/XIII Type 9b, SS 14 2321, DIN 17440 X22CrNi17'
- 100% Silicon free
- Grease that conforms to Food Grade regulations

EX certification valid for fixture mounted use only with a maximum surrounding temperature of +40°C (104°F).

For optional stainless steel motor cell, vane kits and other accessories see chapter Accessories.

For information about performance curves, see page 7.

VANE MOTORS Lzb22-L-LR

Low speed, low torque, lubrication free and reversible

Lzb22-RL-LR

Stainless steel, low speed, low torque, lubrication free and reversible

Maximum permitted torque 9 Nm (6.6 lb_f·ft)

Within their working range these motors have a very steep torque curve. Speed and air consumption are relatively constant regardless of the load.

Stainless steel version:

- 100% Silicon free
- Grease that conforms to Food Grade regulations

EX certification valid for fixture mounted use only with a maximum surrounding temperature of +40°C (104°F).

For optional stainless steel motor cell, vane kits and other accessories see Chapter accessories.

VANE MOTORS LZB34-RL

Stainless steel and lubrication free

**0.25 – 0.39 kW
0.34 – 0.52 hp**

Material in parts:

- Back head, casing and front part stainless steel:
ISO 683/XIII Type 17, SS 14 2346, DIN 17440 X12CrNiS188
- Outgoing shaft and gear rim stainless steel:
ISO 683/XIII Type 9b, SS 14 2321, DIN 17440 X22CrNi17
- 100% Silicon free
- Grease that conforms to Food Grade regulations

EX certification valid for fixture mounted use only with a maximum surrounding temperature of +40°C (104°F).

For optional stainless steel motor cell, vane kits and other accessories see chapter Accessories.

¹⁾ For Shaft loading curves, see page 16.

NOTE: - If running motors with 100% dry air and no lubrication, performance can be reduced with 5-15% at max output.

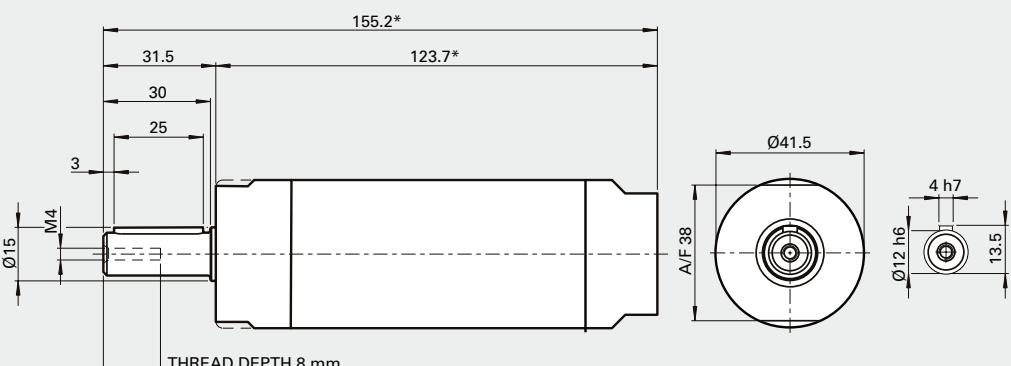

- To optimize life time for a lubrication free motor, use lubricated air if the application allows it.

For information about performance curves, see page 7.

VANE MOTORS Lzb33-L-LR

Low speed, low torque, lubrication free and reversible

Lzb34-RL-LR

Stainless steel, low speed, low torque, lubrication free and reversible

Maximum permitted torque 14 Nm (10.3 lb ft)

For applications where low speed and high torque are required Lzb33 high torque/low speed motors should be considered, see page 36. Within their working range these motors have a very steep torque curve. Speed and air consumption are relatively constant regardless of the load.

Stainless steel version:

- 100% Silicon free
- Grease that conforms to Food Grade regulations

EX certification valid for fixture mounted use only with a maximum surrounding temperature of +40°C (104°F).

For optional stainless steel motor cell, vane kits and other accessories see chapter Accessories.

¹⁾ For Shaft loading curves, see page 16.

²⁾ Flange is mounted and supplied with the motor.

The brake needs minimum 3 bar to release. Performance curves same as standard motors, see page 33 and 38.

NOTE: - If running motors with 100% dry air and no lubrication, performance can be reduced with 5-15% at max output.

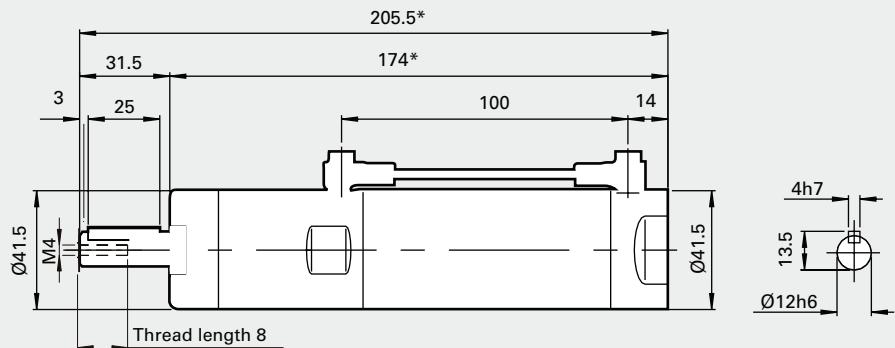

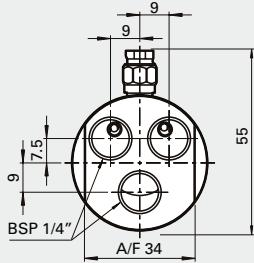

- To optimize life time for a lubrication free motor, use lubricated air if the application allows it.

VANE MOTORS LZB46-RL

Stainless steel and lubrication free

0.60 – 0.84 kW
0.80 – 1.13 hp

Material in parts:

- Casing and front part stainless steel: ISO 683/XIII Type 17, SS 14 2346, DIN 17440 X12CrNiS188
- Outgoing shaft and gear rim stainless steel: ISO 683/XIII Type 9b, SS 14 2321, DIN 17440 X22CrNi17
- 100% Silicon free
- Grease that conforms to Food Grade regulations

EX certification valid for fixture mounted use only with a maximum surrounding temperature of +40°C (104°F).

For optional stainless steel motor cell, vane kits and other accessories see chapter Accessories.

¹⁾ For Shaft loading curves, see page 16.

NOTE: - If running motors with 100% dry air and no lubrication, performance can be reduced with 5-15% at max output.

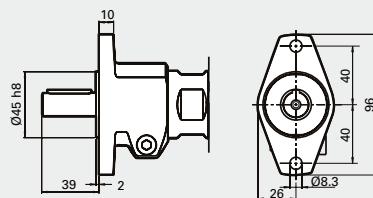

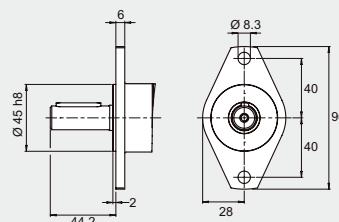

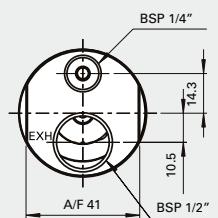

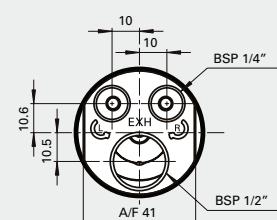

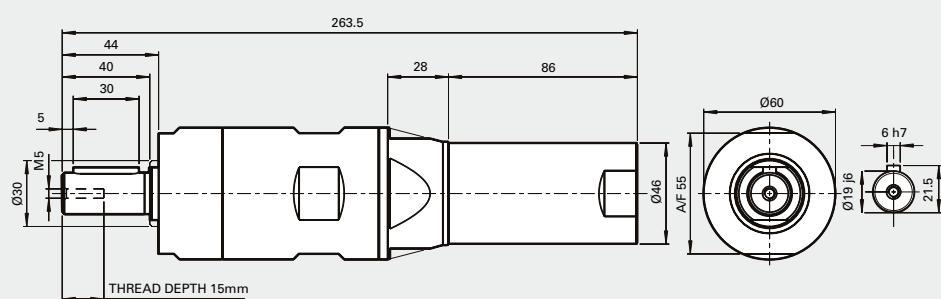

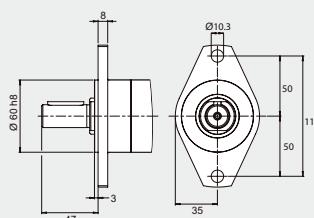

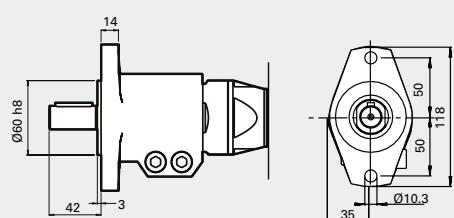

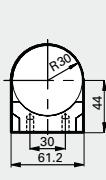

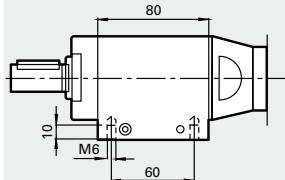

- To optimize life time for a lubrication free motor, use lubricated air if the application allows it.

VANE MOTORS LZB54-LB

Brake module, lubrication free and reversible

**0.79 – 0.82 kW
1.05 – 1.10 hp**

Braking torque from 15–200 Nm.
The brake is activated by spring force and released by air pressure.

EX certification valid for fixture mounted use only with a maximum surrounding temperature of +40°C (104°F).

For optional vanes and accessories see chapter Accessories.

Data at air pressure 6.3 bar (91 psi)

¹⁾ For Shaft loading curves, see page 16.

The brake needs minimum 5 bar to release. Performance curves same as standard motors.

NOTE: - If running motors with 100% dry air and no lubrication, performance can be reduced with 5-15% at max output.

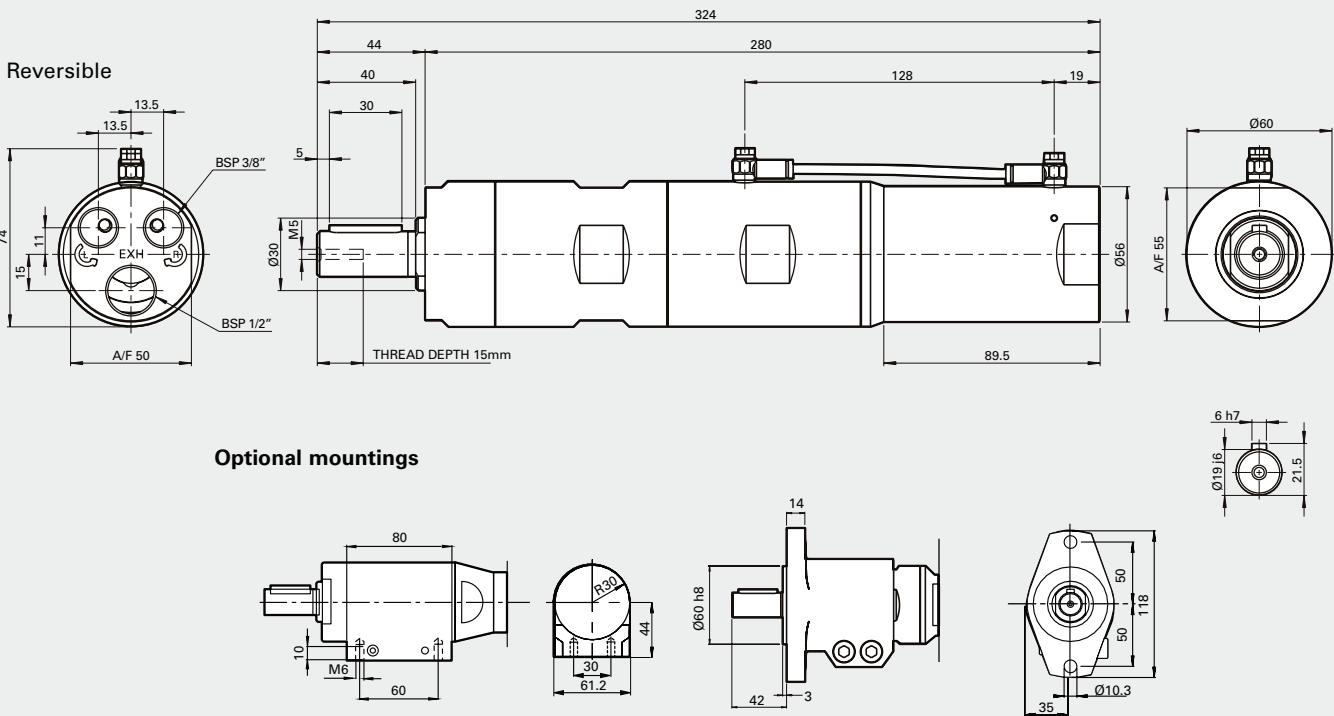

- To optimize life time for a lubrication free motor, use lubricated air if the application allows it.
